

The Truth

We chiropractors work with the subtle substance of the soul. We release the imprisoned impulse, the tiny rivulets of force, that emanates from the mind and flows over the nerves to cells and stirs them into life. We deal with majestic power that transforms common food into living, loving, thinking clay; that robes the earth with beauty and hues and scents the flowers with the glory of the air.

In the dim, dark, distant long-ago, when the sun first bowed to the morning star, this power spoke and there was life; it quickened the slime of the sea and dust of the earth and drove the cell to union with its fellows and countless living forms. Through eons of time, it finned the fish and winged the bird and fanged the beast. Endlessly, it worked, evolving its form until it produced the crowning glory of them all. With tireless energy, it blows the bubble of each individual life and then, silently, relentlessly dissolves the form and absorbs the spirit into itself again.

And yet, you ask, "Can chiropractors cure Appendicitis or the Flu?" Have you more faith in a spoonful of medicine than in the power that animates the living world?

B.J. Palmer, D.C. PhC.

Now wait, stop, read the above once more and this time without judgment, feel the real and true underlining meaning.

Regardless of the origin of our own religious beliefs, we can usually all agree that some higher power created us. And with our creation the gift of the innate intelligence, the power within that not only permits each individual an unparalleled uniqueness, but also gives a beautiful homeostasis to the environment beneath the skin. We may

simply believe down to our core that what has created us is of the greatest intelligence, far more so than our imaginations would even allow us to contemplate. Yet still, somehow we concede to think that we may know more, or that something was forgotten or left out. We somehow find the necessity to add to a new life as it comes into the world. Despite the consequences, we think we must "jump start" the immune system with a vaccine (which do not immunize us), with a drug (that may even "shut off" an immune response), or even with a homeopathic remedy (given with the belief that body needs help). From where does this belief come?

It comes from the outside. Really the answers begin within where the true gift of our creator lies.
