

Part 1: Did you know that the majority of vaccinations are reliant upon a stabilizer? Can you believe that what are used to stabilize these vaccines are chemicals, toxins that are harmful to us and even deadly?! Can you believe the two most common stabilizers that accompany these injections are Mercury and Formaldehyde?

Part 2: Did you know that the saddening disease called Alzheimer's is linked and related to the buildup of Aluminum and Mercury in your brain? Did you know that people who have had five flu-shots are ten times more likely to develop Alzheimer's disease than people who have had none?

DID YOU KNOW

...That your body does not create mercury, formaldehyde or aluminum, for a good reason?

...That your body has a very delicate and meaningful balance, and that it creates all it needs to grow, reproduce, heal and fight disease?

...That the only way mercury can get into your blood system or body legally is through a vaccine or an amalgam filling, because it is so deadly!?

...That many pots and pans are aluminum and most antiperspirants use aluminum to keep you dry!?

...That besides preserving us, Formaldehyde causes cancer!?

...That there is no law stating anyone must be vaccinated and public schools can not refuse a healthy child who has not been vaccinated!?
